SCIENTIFIC SURFACE SOLUTIONS
TRESPA® TOPLAB® PLUS

ANTIBACTERIAL AND HIGHLY CHEMICAL RESISTANT

TopLab®PLUS is the perfect surface for quality worktops with inherent antibacterial properties and highly resistant to a wide variety of aggressive chemicals.
SCIENTIFIC SURFACE SOLUTIONS

THE CHOICE FOR SAFE AND DURABLE LABORATORY, RESEARCH AND EDUCATIONAL ENVIRONMENTS

TODAY’S LABORATORY AND FUNCTIONAL ENVIRONMENTS DEMAND COMPLIANCE WITH RIGOROUS CODES AND STANDARDS. THEREFORE, SELECTING THE RIGHT MATERIAL IS OF CRUCIAL IMPORTANCE. TRESPA® TOPLAB® OFFERS THREE PRODUCT LINES THAT MEET THE HIGHEST REQUIREMENTS WHILE OFFERING AN ATTRACTIVE AND TIMELESS PALETTE OF HIGH-QUALITY DÉCORS.

TRESPA® TOPLAB® BASE
THE HEAVY DUTY SURFACE

TopLab®BASE is the robust and lasting panel for worktops and cabinetry applications where scratch and wear resistance are of great importance whereas the chemical resistance of the surface is not critical.

TRESPA® TOPLAB® VERTICAL
PERFECT FOR FUME HOODS AND LABORATORY VERTICAL CONSTRUCTED COMPONENTS

TopLab®VERTICAL comprises chemically resistant and antibacterial surfaces for applications in healthcare, cosmetics, food, pharmaceutical and laboratory environments, such as cabinetry, peg boards, splash backs and cladding in fume hoods.
The three product lines combine basic requirements—like long-lasting surface hygiene, impact and scratch resistance, flexibility and easy to use—with aesthetic qualities that can contribute to enhance the experience of employees and visitors.

**TRESPA® TOPLAB® PLUS**
Manufactured with Trespa’s unique Electron Beam Curing (EBC) technology, Trespa® Toplab® PLUS surface is easy to clean and shows a high resistance to a large number of aggressive chemicals. It also has inherent antibacterial properties without the addition of microbial additives. Trespa® Toplab® PLUS panels provide an ideal choice in environments where hygiene, avoidance of contamination, sustainability, ergonomics and safety are of importance. Trespa® Toplab® PLUS is extensively used in a wide variety of lab environments worldwide, including chemical, physical, analytical and microbiological laboratories.

**TRESPA® TOPLAB® VERTICAL**
Ideal for environments where bacteria and dirt pose a real threat. Trespa® Toplab® VERTICAL comprises chemically resistant and antibacterial surfaces for applications in functional and laboratory environments, such as cabinetry, special covering for modular elements, and lining of fume hoods and splash backs. Manufactured with Trespa’s EBC technology, its surface is smooth and shows a significant low dirt accumulation making it easy to clean. Trespa® Toplab® VERTICAL is available in Standard and Fire-Retardant grade.

**TRESPA® TOPLAB® BASE**
Engineered for long-lasting and good looks, Trespa® Toplab® BASE offers an outstanding performance for educational, laboratory and institutional applications where chemical resistance is not critical. Its melamine surface delivers excellent scratch resistance and overall durability, retaining its appearance for a long time. Trespa® Toplab® BASE is highly resistant to wear, making it ideal for worktops and cabinetry applications where severe use and frequent cleaning are expected. Its surface is not adversely affected by moisture and the panel remains impervious to mould or rot.
LOW MAINTENANCE
The closed surface of Trespa® Toplab® practically withstands dirt accumulation, keeping it smooth and easy to clean. To know more about the cleaning, please visit trespa.info.

DESIGN FLEXIBILITY
With high performance comes design freedom. Trespa® Toplab® offers a range of classic, modern and trend-setting colours and is available in several thicknesses and sizes. The panels have a homogenous core and can be machined similar to high-quality hardwoods.

10-YEAR PRODUCT GUARANTEE
The unique properties of Trespa® Toplab® panels make them highly durable. That is why Trespa offers a 10-year conditional guarantee on its product line. Please refer to your local sales representative for more information.

TESTING AND CERTIFICATION
Trespa® products for scientific surface solutions are tested and certified according to international standards in relation to chemical resistance, antibacterial performance, low emission, food contact and decontamination. Trespa International B.V. is a member of SEFA (Scientific Equipment and Furniture Association), EGNATON (European Association for Sustainable Laboratory Technologies) and VIP3000. To see available certifications, please visit trespa.info.

USING RENEWABLE RESOURCES
The entire Trespa® Toplab® product range is now available with PEFC™ (Programme for the Endorsement of Forest Certification”) or FSC™ (Forest Stewardship Council”) certification upon request for restricted quantities and jurisdictions. The use of FSC™ and PEFC™ certified Trespa® panels may also contribute to points associated with LEED certification for buildings. These certifications are one of the initiatives resulting from Trespa’s Sustainability Policy, by which Trespa shows its commitment to the use of raw materials from sustainable origin and to forest preservation.

ABOUT TRESPA
Trespa International B.V. is a leading innovator in the field of architectural materials, recognised internationally as a premier developer of high quality panels for exterior cladding, decorative façades and scientific surface solutions. Since its founding in 1960, Trespa has worked closely with architects, designers, installers, distributors and end users globally. Trespa believes in product innovation, combining quality manufacturing technologies with smart solutions for architectural and scientific surface solutions.
